

Whether you need visual or audible privacy — you should be in control. LC Privacy Glass from Innovative Glass gives you that control. It is an extremely versatile eGlass® technology that instantly provides business environments complete privacy — whenever they need it. Here are some key features:

- Controllable by wall switch, mobile device, or voice command
- Provides full visual privacy on demand, along with significant sound reduction
- When powered, panels are transparent, allowing full view and daylight. When unpowered, view is obscured, providing complete privacy
- Fits most partition and glazing systems
- It's maintenance-free and durable
- It's ideal for open concept designs
- Eliminates the need for window treatments and mechanical shades or blinds
- Operates on 110/120VAC (simple line voltage)
- Can be used for interior or exterior applications
- Blocks 99% of damaging UV rays
- Available in attack-rated and ballistic configurations
- Available as a pre-glazed, pre-wired window unit, or as pre-cut panels with or without hardware
- Safety-laminated (5/16" thickness and up) and available as tempered, or in various IGU thicknesses for exterior glazing systems

LC PRIVACY GLASS

THE POSSIBILITIES ARE ENDLESS

Use LC Privacy Glass for:

- Conference / Meeting Rooms
- Private Offices
- Walls, Doors and Windows
- Most Partition System
- Lobbies
- *And so much more*

Because it is so versatile, LC Privacy Glass is a perfect eGlass® solution for businesses, private residences, and for nearly any industry, including Education, Hospitality, Automotive, Government and Healthcare. And since it is custom-produced, there are endless design options and configurations available.

YOU'RE IN CONTROL

With the growing popularity of open concept work environments, designing glass-enclosed conference rooms and offices has become a necessity. But with that comes the feeling of working in a “fishbowl.”

Switchable LC Privacy Glass walls, doors, and windows become “frosted” when you want privacy, and instantly revert back to a transparent state, by switch, mobile device, or voice command. When frosted, the glass blocks out visual distractions and keeps meetings private while allowing diffused light to pass through. Switched back to a transparent state, spaces are visually re-opened.

MORE BENEFITS AND OPTIONS

- **Demountable Framing Systems** — Can be used in installations that offer possible tax credit advantages.
- **PowerTrack™** — Our patented and customizable PowerTrack is used in all types of doors, including sliding, telescopic, synchronized and breakaway doors — available only through Innovative Glass.
- **Rear Projection Presentations and Displays** — From conference rooms and board rooms — to arts, entertainment, and retail displays — the rear projection capabilities of LC Privacy Glass provides an experience that grabs the attention of your audience and keeps them engaged. And, it also functions as a whiteboard.

LC Privacy Glass for conference rooms, board rooms, executive offices, and more — 100% privacy on demand.
